FACIAL RECOGNITION

Facial Recognition is one of the latest and most advanced developments in the field of video surveillance solutions, and is the perfect technology for organizations requiring a comprehensive and proactive security protection strategy (Government agencies, law enforcement and border protection agencies, retail, transportation, event security, casinos and other public spaces. etc.).

FACEFIRST - FACE RECOGNITION PLATFORM

FaceFirst is one of the World's fastest, most accurate and highly effective enterprise face recognition platform for law enforcement, retail, transportation, event security, casinos and other public spaces.

SCALABLE PLATFORM

The platform is designed to be scalable, fast and highly accurate, providing surveillance solutions an underlying software platform that leverages artificial intelligence to prevent theft, fraud and violence - all while maintaining the highest levels of security and privacy, with all data encrypted at rest, and during transmission into non-convertible biometric templates.

GDPR & DPA 2018

Our Facial Recognition solution, FaceFirst, takes information security, protection, and privacy of customer personally identifiable information (PII) data very seriously and follows software industry best practices. FaceFirst fully supports and abides by the data privacy principles established by applicable local privacy laws and regulations.
